About Me

Since the deployment of my first 'Hello World', I have been hooked on coding. While being an engaging challenge to continuously learn and improve my skills, web development allowed me to combine my two greatest strengths: passion for creation, and problem-solving. Coming from a logistics background, where cross-team collaboration is the key to success, I have also developed a flexible and empathic communication style.

Projects

Tetris
tinyurl.com/cn-tetris

Built with pure JavaScript code (no libraries), conveniently packed in a single file. Game board constructed with a two-dimensional array and used as coordinates to position DOM elements onto HTML. Enables keyboard, on-screen touch, and mouse click controls. Locally saves high-score across the sessions.

Recipe Web App
tinyurl.com/cn-paprika

Recipe book web app, built with React framework and Firebase database. Includes CRUD operations for recipes, live updates for 'likes', Google login, search by keywords (with no extra libraries used), custom hooks, and full nutritional analysis (using Edamam API). Design inspired by Material-Ui framework.

URL Shortener
tinyurl.com/cn-shortcutt

Created with NodeJs and Express for back-end, MongoDB Atlas for database, and EJS for front-end. Features link customization and keeps the record of how many times each link got clicked.

Artistry Website
tinyurl.com/cn-artistry

A freelance front-end project for a local business. Built with HTML, CSS, Node, Express, and jQuery. Designed as a fully responsive single page as per the client's request.

Education

Web Development Certificate
Udemy

- Completed an intensive Full-Stack Web Development focused on JavaScript, HTML, CSS and most popular frameworks, libraries and tools
- Built 20+ web apps and static pages

Aviation Operations
Seneca College

- Graduated aviation-focused transportation logistics program with Honours
- Actively participated in a volunteering student mentoring and adaptation program

Skills

React.js
JavaScript
NodeJs
jQuery
